STRETCH DRY SYSTEM

More comfort, less heat: a goal that OMP pursues since always, and now concretizes with STRETCH DRY SYSTEM. The maximum breathability of OMP Dry System is combined with the elasticity of 3D materials, to allow the best freedom in movements while reducing body temperature. Two fundamental elements to help drivers improve their performance.

The cooling effect of the inserts is improved when worn with the OMP ONE breathable underwear that now offers a cooling spray solution. OMP's Dry System is a registered utility model.

SUMPGUARDS, TANKGUARDS AND DIFFERENTIAL GUARDS

Made from a special aluminium alloy, these sumpguards have several functions: they protect the mechanical parts such as sump, gear-box, transmission etc. and they also contribute to stiffen the whole body and the front part of the car. For this reason they are suitable for every day use and are particularly useful for those driving on uneven roads. Search Complete Application List - also on www.ompracing.com

Very compact and ultralight fire extinguisher system, electrically activated, suitable for saloon cars. FIA 8865-2015 rules complying. Aluminium bottle, the extinguisher can turn off fire in few seconds injecting in the cockpit and in the engine bay different fire-extinguishing medium. The system gets pressurized when activated enabling the discharge of the extinguishant. 3 nozzles are for the engine bay in order to protect the most critical and dangerous parts depending on the type of vehicle, 2 nozzles are for the cockpit to ensure the driver front and rear protection. The system is available in two versions: "L" version (only for medium-large sized cockpit) and "S" version (suitable for small size cockpit). L and S systems have the same dimensions and weight, but different amount of fire extinguisher medium in way to be safe and efficient at the same time. Fixing brackets, clamps, tubing and connections are included.

Total weight: 5,2 kg (only bottle)

TYRE WARMERS

A line of tyre warmers available in 4 different standard sizes, offering greater versatility across a wider range of tyre sizes and now available in two types: with a standard temperature control thermostat or with a central electronic temperature control box.

Interior: Nomex®.

Exterior: Cordura® which improves transpiration allowing moisture to escape away from the tyre.

Electrical cables and connectors are compliant with EEC electrical standards.

Upon request, tyre warming blankets can be made to measure. Tyre warmers for motorcycles are also available upon request.

Tyre warmers models with a Central Electronic Temperature Control Box (part number T200) allows each of the 4 tyres to have individual temperature settings. The control box features an electronic control device controlled by software preventing overheating. The external case of the control box is ABS plastic with an electrical protection rating of IP44.
